Scheduling and Labor Management

How SpeedLine Solutions and 7shifts Power Smarter Operations for Pizza & Delivery Restaurants

SpeedLine Plus and 7shifts work together to give pizza and delivery restaurants a tightly connected operational system, combining SpeedLine's delivery-focused POS data with 7shifts' scheduling, labor, communication, and payroll tools. This integration helps managers build accurate schedules based on projected sales and labor targets, track labor in real-time, automate tip distribution, and keep teams aligned through a unified mobile hub. The result: smoother operations, fewer manual tasks, better labor control, and a more connected staff. You can stay focused on fast delivery, great guest experiences, and growing your business.

Scheduling

Scheduling tools give managers full control to build, test, and publish accurate schedules while giving employees instant access through the mobile app or web portal. Every update is tracked for complete accountability, and smart features help reduce labor-costs and prevent compliance issues.

- **Smart Scheduling:** Centralized, accountable scheduling accessible from any device

Labor Management

Labor management features provide managers with clear oversight of employee hours while giving staff easy access to their timesheets. Time clock approvals and notifications streamline communication, reduce errors, and help maintain accurate labor reporting across the team.

- **Precise Labor Oversight:** Transparent time tracking with streamlined time clock approvals

Employee Engagement & Communication

Employees can manage shifts, request time off, review time clock records, and receive announcements all from their mobile device. Meanwhile, managers can approve changes and send messages instantly.

Furthermore, a detailed activity log keeps everyone aligned and accountable.

- **Connected Teams:** A unified mobile hub for communication and shift management

Tip Pooling

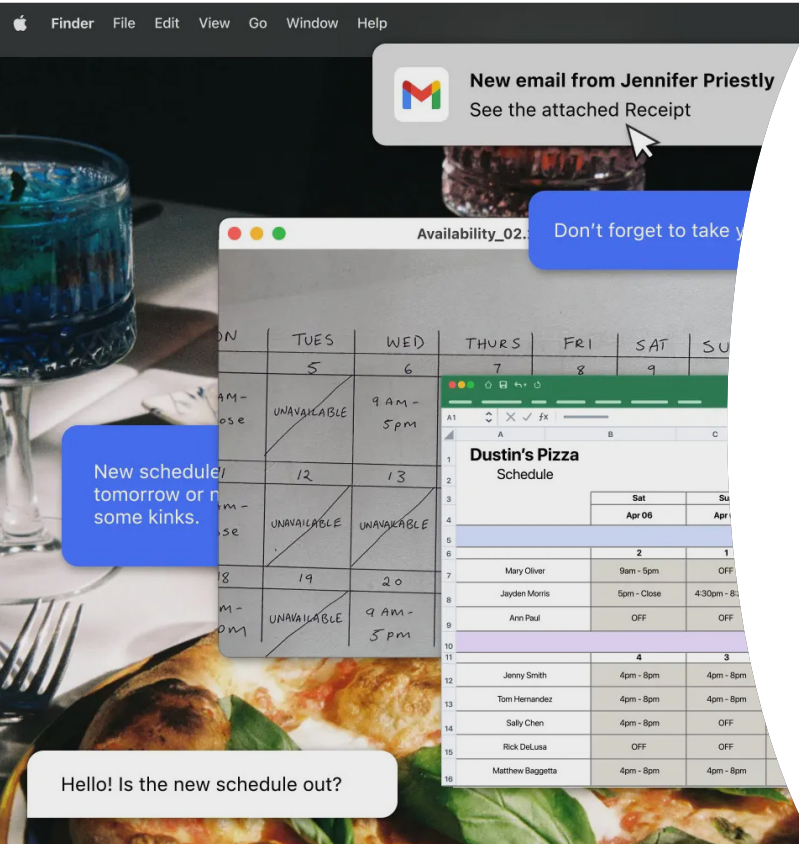

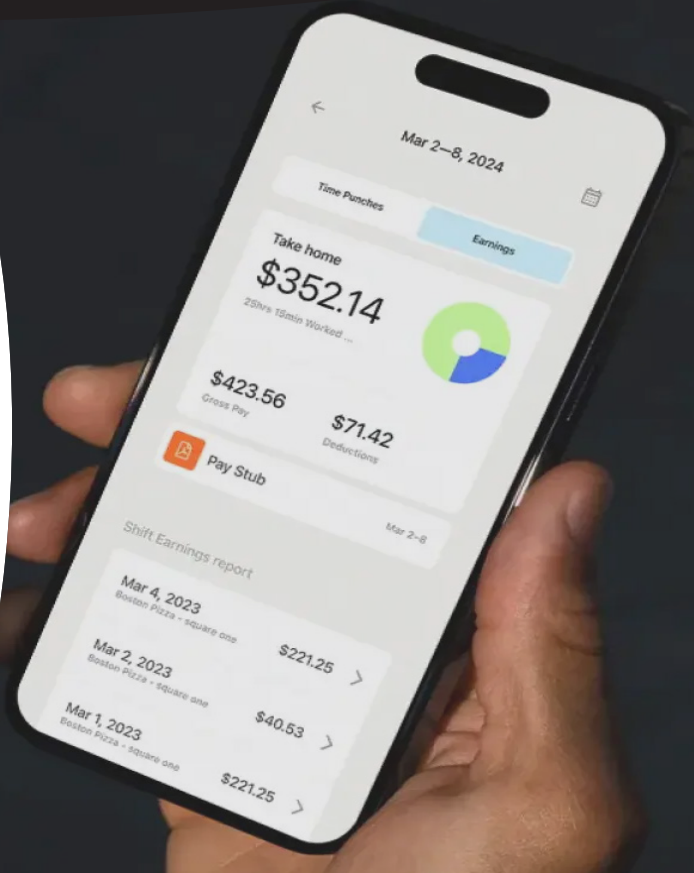

Tip pooling removes manual tip calculations by applying customizable rules that ensure fair and transparent tip distribution. This simplifies your daily end-of-shift processes and supports accurate payroll reporting.

- **Fair Distribution:** Automated, rule-based tip pooling that removes manual work

Labor Management & Compliance

Labor tools provide real-time visibility into labor costs, forecasting based on historical data, and manager alerts for compliance risks like overtime or missed breaks. This helps operators stay efficient, compliant, and in control of labor spending.

- **Proactive Compliance:** Real-time labor insights with alerts to prevent violations

Payroll Processing

Payroll integrates more seamlessly with scheduling, time-clocking, and tip data, reducing administrative work and improving accuracy. 7shifts integrates with leading payroll providers, automating payroll or exporting customized payroll data for direct import.

- **Seamless Payroll:** Integrate your labor data with leading payroll providers or export customized payroll data for direct upload

Together, these tools give restaurants a powerful, connected platform that simplifies operations and strengthens team communication.

Keep labor, payroll, and compliance running smoothly so you can stay focused on delivering great guest experiences and growing your business.
