

SpeedLine and DoorDash Drive: Streamlined Delivery from Order to Drop-Off

Have you ever sent drivers home because it's slow, only to encounter a sudden influx of delivery orders?

Balancing delivery rosters can be a delicate act. Schedule too many drivers, and you're wasting labor dollars. Schedule too few, and you risk frustrating customers and losing future business.

The integration between DoorDash Drive and SpeedLine solves this dilemma. It ensures your orders always hit the road during a rush, without the burden of extra staffing costs when things slow down.

Getting Started With DoorDash Drive

DoorDash Drive provides a powerful, on-demand delivery network that integrates directly with SpeedLine. Together, they provide a reliable backup when deliveries outpace available staff drivers. Dispatch the order directly from Terminal and track orders, or check your order history from the DoorDash Merchant Portal.

DoorDash Drive onboarding is designed to be fast and straightforward. A simple onboarding form and quick billing selection activate your store, creating a smooth start for any restaurant team. SpeedLine connects to DoorDash Drive with a single setting, giving operators a clean, reliable integration without extra configuration or technical steps.

Easy, Seamless Dispatch and Delivery

Using the DoorDash Drive integration is simple. Orders may be dispatched to a Dasher directly from your POS. A welcome email walks you through placing a test order and accessing the DoorDash Merchant Portal. From there, tracking deliveries and reviewing order history both happen in one place, making the entire experience smooth and stress-free for busy restaurant teams.

Why DoorDash Drive Feels Effortless

- **Simple POS connection** through SpeedLine
- **Instant access** to the DoorDash Merchant Portal
- **Easy tools** for tracking and managing deliveries
- **Quick onboarding form** to activate your DoorDash Drive account
- **Flexible billing options** for single locations or larger enterprise brands

Dispatching Deliveries with DoorDash Drive and SpeedLine

DoorDash Drive makes dispatching simple and seamless from within SpeedLine Terminal. When DOORDASH is selected from the Dispatch screen, SpeedLine sends the details directly to DoorDash, and a Dasher is assigned automatically.

Operators can quickly review the estimated pickup and delivery times, confirm the request, and watch the order as it moves through each stage. Everything updates instantly, ensuring a smooth, hands-off delivery workflow that keeps orders moving and customers happy.

What Makes It Easy

- **Real-time tracking** from dispatch to drop-off
- **Effortless** Dasher assignment for deliveries you choose
- **Instant confirmation** of all pickup and delivery times
- **Clear order status** inside SpeedLine Terminal and the DoorDash Drive portal

DoorDash Drive Cash (Cash on Delivery)

A Simple Way to Accept Cash for DoorDash Drive Deliveries

DoorDash Drive Cash allows Dashers to collect cash payments from customers on any delivery order. Restaurants get more flexibility while still using DoorDash's own network.

How it Works

- The Dasher collects the exact cash amount from the customer at delivery
- The cash belongs to the Dasher
- DoorDash deducts the amount from the Dasher's future payouts to balance the transaction
- Dashers can opt-in or opt-out at any time

This allows restaurants to collect cash for delivery orders, giving customers another payment choice.

With your labor, payroll, and compliance running smoothly, you can stay focused on delivering great guest experiences and growing your business.

Why SpeedLine and DoorDash Drive Is a Winning Combination

Together, SpeedLine and DoorDash Drive create a seamless delivery workflow that helps restaurants:

- Reduce delivery management workload
- Improve delivery speed and service reliability
- Track every order from dispatch to drop-off
- Maintain visibility into fees, timing, and activity
- Offer flexible payment options, including cash
- Provide a better customer experience with fewer operational headaches

It's a modern, efficient solution built for restaurants that want to grow without adding more complexity.
