

Your brand on your customers' phones

A mobile app is an effective way to keep your restaurant brand top-of-mind when customers order takeout or delivery. The SpeedDine mobile app puts your brand in front of customers every time they pick up their phones.

The App Delivers These Benefits:

- Convenient, instant access
- Your branded icon lets customers start an order from their phone's home screen
- Position your brand where third-party food delivery apps like Grubhub, Uber Eats and Doordash have had the advantage
- With easy one-touch access to your menu, customers don't have to search the web for you

Customization Options

Customizable features include:

- Home screen icon
- Startup and main app screen's logo
- Branded colors
- About Us information

All the benefits of SpeedDine

Whether they use your SpeedDine site or mobile app, your customers get the same easy, responsive, mobile-friendly brand experience, including:

- Simple order flow
- Accurate pricing that always matches the store
- Upselling and cross-selling suggestions
- Location map and hours for pickups
- Current delivery times

What it includes:

- Available on the Apple App Store and Google Play
- Seamless connection to your SpeedDine menu
- Automatic updates as new functionality is added

Note: The SpeedDine App requires an active SpeedDine subscription from SpeedLine.
