

SpeedLine + accessiBe: Advanced ADA Compliance for SpeedDine

In today's modern digital landscape, your online ordering platform is the front door of your restaurant. Ensuring that everyone can walk through that front door will increase profits, benefit the community, and ensure your business is compliant with regulations.

SpeedLine is proud to partner with accessiBe to provide an additional layer of protection and enhanced user accessibility for your SpeedDine online ordering site.

Why Accessibility Matters Now

Web accessibility was always a best practice, but the U.S. Department of Justice has made it a legal requirement under the Americans with Disabilities Act (ADA). To meet these requirements, websites must conform to WCAG 2.1 Level AA standards.

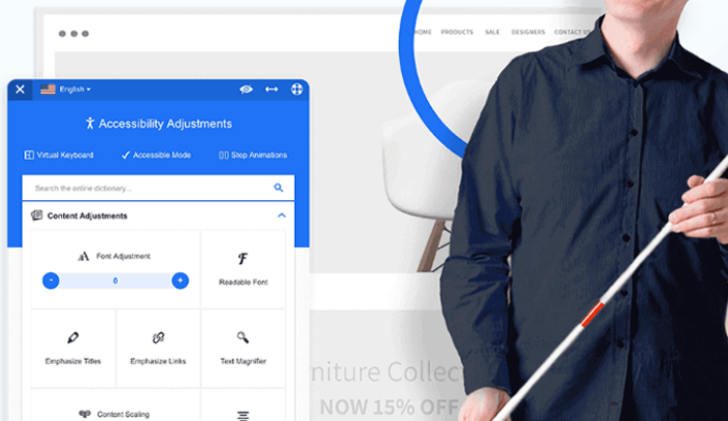

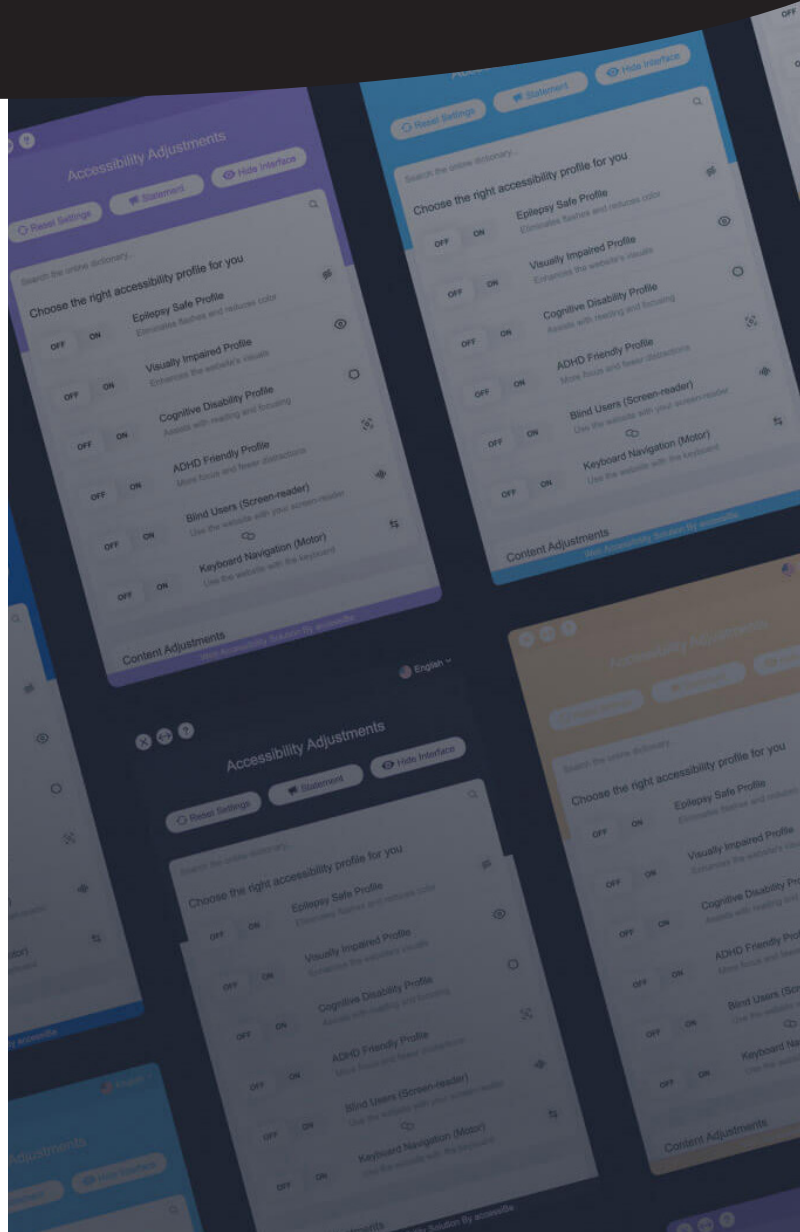

The Risks of Non-Compliance:

- **Legal Vulnerability:** Businesses face an increasing tide of ADA-related lawsuits, especially in jurisdictions where Private Right of Action is permitted
- **Excluded Revenue:** Without accessible design, you lose customers with vision, hearing, motor, or cognitive impairments
- **Reputational Risk:** Modern consumers value inclusivity and proactive risk management

The accessiBe Advantage

SpeedDine is fully aligned with modern accessibility standards, using rigorous manual and automated scans. accessiBe's AI-driven accessWidget takes it one step further, delivering seamless, real-time remediation to your online ordering site to ensure an exceptional digital dining experience for everyone.

- **Continuous AI Scanning:** Advanced technology constantly monitors and adjusts your site to resolve accessibility issues the moment they arise
- **Customized User Experience:** A specialized interface allows users to tailor your website to their specific needs (such as screen reader optimization or keyboard navigation)
- **Visible Deterrent:** Displaying the accessWidget icon shows potential litigants that you are proactively compliant, helping to deter opportunistic legal filings
- **The VPAT (Your Legal Receipt):** accessiBe customers have access to a Voluntary Product Accessibility Template. This formal document is your first line of defense, providing a documented trail of conformance for legal inquiries or audits

Comprehensive Coverage for Every User

The WCAG 2.1 Level AA guidelines ensure your SpeedDine site is navigable for individuals with:

- Blindness and low vision
- Deafness and hearing loss
- Limited movement or motor disabilities
- Photosensitivity and seizure risks
- Cognitive and learning limitations
